EDGAR A. DANFORTH, TOWN CLERK.

REPORT OF THE BOARD OF EDUCATION.

The Board organized April 15 :

F. B. RICHARDS, *Chairman*.

ABBIE F. CRAM, *Secretary*.

J. H. GOODRICH, *Treasurer*. *Appointed for the year*.

Whole number of pupils registered, 118.

Cost per pupil, \$10.99.

Number of schools, 7.5.

Average weeks of school, 22.1.

Number of teachers employed, 11.

“ “ resident of Lyndeboro', 4.

Saw an item not long ago stating that the cost per pupil in the United States is \$17.22.

Good work has been accomplished during the year, and we thank the teachers who have been diligent and untiring in their efforts, and alive to the importance of their work.

We believe in the Kindergarten, and are glad that some of our teachers introduce so much of the work in their schools. We think school rooms should be pleasant and attractive, and that little ones should be kept busy and happy. Hope parents will do what they can to help in the good work.

Should have been glad to have had a less number of schools, as some of them were very small, but did not see how they could well be united.

The spring term in No. 2, on account of sickness, only kept five weeks. Were sorry not to have a longer term, as the teacher was faithful, and the pupils were making good progress.

No. 9, closed for the same reason, without an examination, but judging from previous visits, we are sure good work was done.

In the fall, sickness caused No. 7, to miss an examination. Although a very small school, we hear good reports from it, and feel sure that teacher and scholars well improved their time.

The closing exercises of the other schools were interesting, and were a credit to teachers and pupils. In remarks in No. 6, register we find, "Archie Melendy spelled thirteen hundred words within thirteen weeks, and only missed fifty." Pretty good report for a boy of eleven.

It is not wise to censure teachers in the presence of pupils, or to take them from school on account of complaints they make, without first visiting the school, and seeing how it is conducted. If this was done, think in most cases parents would decide that it was much better for them to remain, and so derive the fullest benefit from the money expended for them.

Nothing but illness should keep pupils from school. While it is in session it is their business to be there, and to be in season. This part of their life's work is as important as any thing they will do in later years. The success or failure of a person's life depends very much on the way the school days are spent.

To succeed, they must:

"Keep striving! The winners are those who have striven
And fought for the prize that no idler has won;
To the hands of the steadfast alone it is given,
And before it is gained there is work to be done."

We have purchased charts for the schools, and teachers find them very useful. Anyone who has examined them, cannot fail to see that much benefit can be derived from them. Some, doubtless, think that more money is spent for schools, and school supplies, than need be. We think a noted writer spoke truly when he said, "Money put in school houses is money saved from the penitentiaries. The best way to lessen our taxes is to pay more money for the intelligence of the people. There is a style of economy which is the worst extravagance.

Good schools tend toward empty almshouses. It is no rare thing to find educated scoundrelism, but to the vast majority of criminals the writing of their own names is a difficult enterprise."

We hope, despite the hard times, that our schools for the coming year will receive a liberal support, and that parents, and others, will show their interest by attending the school meeting, and by frequent visits to the schools, and encouraging words to teachers and pupils.

The late State Supt. Patterson, a true friend of the schools, wrote, "We think children should be put early to the study of nature, and have no doubt such studies will lead to pursuits which otherwise might not have been followed, and will save to society many a boy and girl that otherwise might have gone wrong. Let us throw out all along the line rubbish, and put in what is practical and disciplinary. These are the things which interest children and prevent waste."

We fully agree with these sentiments, and have tried to interest the children in the beauties and wonders of the world about us, not only on the earth, but in the starry sky above us. "The stars are the landmarks of the universe," and well worth our study. Teachers have kindly aided in the work. Some of the pupils have made quite nice collections of flowers and minerals, and we hope all will continue their researches and find:

"Tongues in trees, books in the running brooks,
Sermons in stones, and good in every thing."

We thank the citizens of the town for the courtesy and kindness they have shown us. They have helped to make our work a pleasant one.

Respectfully submitted,

ABBIE F. CRAM, *Secretary*.
